

FURNITURE SOLUTIONS

Product range India

A global leader in polymer processing technologies

Founded in 1948, REHAU today is a global leader in developing innovative solutions, providing a wide range of products and services to the Construction, Automotive and Industrial sectors. With more than 20,000 employees around the globe in over 170 locations on six continents, REHAU offers incomparable expertise in material development, system design and surface technology and an unwavering commitment to building long-lasting partnerships and alliances with our customers.

REHAU initiated its operations in India in 1998 with local manufacturing in District Pune to cater for local industries market.

As one of the top innovator and market leader in the field of edging technology, REHAU is constantly pushing the boundaries in product design and process development.

REHAU offers a choice of wide range of products which allows one to live with premium quality, thereby, raising the standard of living. These choices are versatile enough to accommodate new changes and that too with convenience. REHAU ensures that a positive difference is made through quality, innovation and choice.

Advanced Living Solutions - A choice of quality living, built upon the three pillars - Inspiring, Proactive and Caring.

Inspiring: We bring innovative and revolutionary ideas while bringing quality in the living spaces.

Proactive: We anticipate the problems and derive solutions to get the work done proactively.

Caring: Conscious care is taken towards our internal and external customers. At the same time, we focus on contributing for our environment and society.

A German based company dedicated to beautify and enrich homes with innovative choices, REHAU prioritizes and delivers superior solutions all the way from product design, applications while providing great variety in terms of choices.

Let's live with quality!

RAUVISIO SURFACES

Exclusive solutions for interior design

THE DESIGN WORLD OF RAUVISIO

The surface range from REHAU

Clean surfaces and minimalist designs are a big trend in the furniture industry, RAUVISIO is an innovative surface range, fully in line with this trend, leaving nothing to be desired. Here, you will find the right solution for any environment.

RAUVISIO mineral

The RAUVISIO mineral solid surface range allows you to expand your selection of interior design products and gain added value. RAUVISIO mineral is perfectly suited to all aspects of interior design and can be used with no restrictions

RAUVISIO crystal / crystal slim

With this polymer glass laminate, REHAU offers maximum flexibility for the production of fronts and splashbacks as well as furniture end panels, with a glass effect. Culminating in a puristic design, which although gives the aesthetic appearance of real glass, RAUVISIO crystal / crystal slim offers the flexible processing characteristics of polymer laminate.

RAUVISIO wave

RAUVISIO wave impresses with its unique surface texture. Material attributes can affect the way in which the light interacts with the surface, creating fascinating patterns. This polymer surface material is ideal for use as front panels, or to create features in commercial and retail environments.

THE DESIGN WORLD OF RAUVISIO

The surface range from REHAU

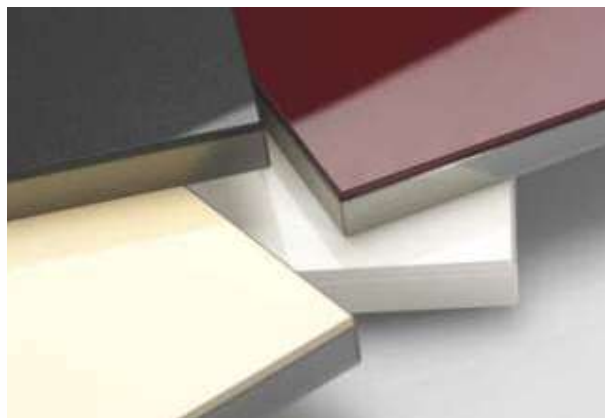

RAUVISIO crystal mirror

RAUVISIO crystal mirror is the polymer mirror for the interior design and furniture industry. RAUVISIO crystal mirror is ten times sturdier than real glass, and thus can withstand even high stress in the kitchen, even when the surface is damaged.

RAUVISIO crystal magnetic

RAUVISIO crystal magnetic is a magnetic polymer glass that can be used for a diverse array of applications. The magnetic function is invisible on the completed component, allowing you to seamlessly integrate magnetic fronts and wall panels into whatever space you choose. Whether as a magnetic cabinet front, magnetic niche in the kitchen or a frameless whiteboard in the office – RAUVISIO crystal magnetic opens up numerous design possibilities.

RAUVISIO brilliant

The high-gloss laminate, RAUVISIO brilliant is a shining example of the latest trends in furniture design and home interiors. Thanks to its brilliant depth effect, RAUVISIO brilliant replaces high-quality lacquered elements and enables you to create outstanding designs for covering vertical furniture fronts.

RAUVISIO MINERAL

The mineral material for interior design

RAUVISIO mineral is a homogeneous, non-porous, mineral-filled acrylic panel made of alumina trihydrate (ATH) and polymethyl methacrylate (solid surface material/SSM). This material, which is durable and easy to clean, has a high-quality appearance and is pleasant and warm to touch. RAUVISIO mineral makes possible a huge range of creative ideas for functional and decorative applications in interior design, kitchens, plumbing, clinical environments, doctor's surgeries and furnishings.

RAUVISIO mineral is:

- Non-porous
- Homogeneous
- Evenly coloured throughout
- Easy to clean
- Food-safe & without taste
- Stain resistant
- Light-fastness
- UV resistant
- Watertight
- Possible to use adhesive without visual trace
- Can be made to look as new with repeated sanding

RAUVISIO CRYSTAL SLIM

The extra-thin glass panel

REHAU developed extra-thin RAUVISIO crystal slim for people who like the glass appearance of RAUVISIO crystal for splash backs, wall cladding, front panel filling or similar areas of application.

4 mm-thin glass panel

is especially suitable for renovating tiled sections

RAUVISIO crystal slim is a 4 mm-thin panel of glass laminate directly pressed with colour-coordinated balancing sheet. It features the same processing properties as RAUVISIO crystal. This thin glass panel is especially suitable for renovating tiled sections, even in wet areas. Custom-made on-site cuts, for example for sockets in splash backs, can be carried out at any time.

Dimensions:

2800 x 1300 x 4mm

RAUVISIO CRYSTAL

The most flexible glass of all time

The polymer glass laminate RAUVISIO crystal is revolutionising the glass application market. The innovation fully compensates for the disadvantages of real glass while combining its own advantages with the positive properties of thermoplastic laminates.

2 mm-thin glass panel

is especially suitable for renovating tiled sections

The RAUVISIO crystal components used for the production of front panels satisfy the highest quality demands. Thanks to its UV lacquer, the glass laminate is scratch resistant and can cope with any wear. The balancing sheet developed in-house is perfectly colour-coordinated to the glass laminate, and is scratch-resistant too.

High-quality finish

Impact-resistant

Easy to clean

Scratch-resistant

100%
UV Protection

Extremely resistant to
deformation

Dimensions:

2800 x 1300 x 2mm
2440 x 1220 x 2 mm

Break and scratch-resistance

Up to 20% less scrap thanks to the low impact and break-sensitivity of RAUVISIO crystal. The material is just as scratch-resistant as real glass and therefore highly durable for end customers.

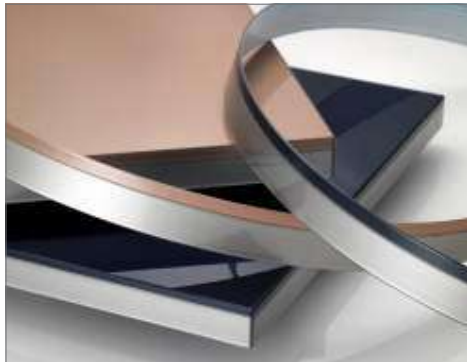

Up to 20 % less scrap

Fully break-resistant and flexible during preparation

Sawing and drilling

Whether for cutting individual pieces or drilling holes for handles or fittings, you can use your woodworking tools with RAUVISIO crystal without any difficulty or danger of breakage and scrap.

Edgebanding

There are two edgeband designs that are perfectly suited to RAUVISIO crystal. In Duo-Design style, RAUKANTEX visions uses its transparent leg to create the appearance of a sophisticated glass panel. RAUKANTEX colour generates its glass appearance via a 45° radius. All edgebands are available in zero-joint quality.

RAUVISIO WAVE

Decorative interplay of light and shadow

The structured laminate, RAUVISIO wave features an impressive, unique wave-like surface. Material attributes can affect the way in which the light interacts with the surface, creating fascinating patterns, while bringing the surface to life.

RAUVISIO wave is a WPC (wood-polymer composite) that is coated with a PO-based (polyolefine) foil. Depending on the area of application, the foil is given a finish. This means that the decorative BIANCO and MORO foils have a hard coating whereas the paintable VARIO variant is coated with a primer. A non-woven material is incorporated into the bottom of the laminate to ensure secure adhesion.

RAUVISIO CRYSTAL MIRROR

Flexible mirror applications

Mirrors can be found almost anywhere whether it is in the corridor, bathroom, bedroom or as an element in upmarket interior design. REHAU offers a polymer mirror for every application that can be used creatively without much constraint.

RAUVISIO crystal mirror can be processed in numerous ways, due to its polymer properties regardless of whether it is for individual pre-cuts or drill holes. In addition to this, the material is flexible enough to form almost any shape. Free-form parts are also not a problem with RAUVISIO crystal mirror.

RAUVISIO CRYSTAL MAGNETIC

Endless application possibilities

RAUVISIO crystal magnetic is a magnetic polymer glass that can be used for a diverse array of applications. The magnetic function is invisible on the completed component, allowing you to seamlessly integrate magnetic fronts and wall panels into whatever space you choose. Whether as a magnetic cabinet front, magnetic niche in the kitchen or a frameless whiteboard in the office – RAUVISIO crystal magnetic opens up numerous design possibilities.

The magnetic functionality is provided by a thin steel inlay. This does not alter the surface properties of the RAUVISIO crystal at all, maintaining the REHAU added value you're used to.

RAUVISIO BRILLIANT

The high-gloss laminate with a lacquered appearance

RAUVISIO brilliant represents the latest generation in high-gloss laminates, thanks to its vibrant depth effect that can replace high-quality painted elements. These perfect and all-round brilliant components are seamless, thanks to their jointless connection between boards and edgebands.

RAUVISIO BRILLIANT

The high-gloss laminate with a lacquered appearance

REHAU creates perfect, high-value polymer front panels via an optimal coordination design of laminate, edge and balancing sheet. The high-gloss laminate has enhanced scratch resistance, making it the best choice for interior applications. The balancing sheet developed in-house is perfectly colour-coordinated to RAUVISIO brilliant, is scratch-resistant and has sufficient freedom from distortion for the pressed board.

High-quality finish

UV resistance

RAUVISIO brilliant possesses an excellent lightfastness and UV resistance. There is no colour fading, regardless of light or sunshine exposure when used for interior applications.

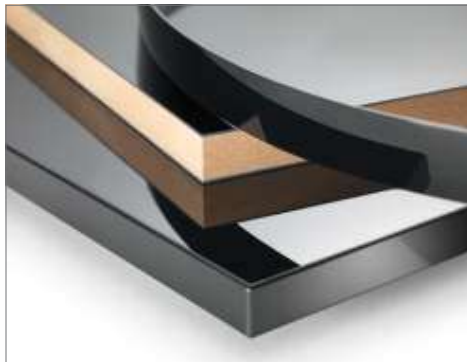

High-gloss around milling radius

The combination of polymer zero-joint-edge RAUKANTEX pro and new processing technologies means that familiar framing effects are a thing of the past with RAUVISIO brilliant. This results in perfect, uniform brilliance across the entire component.

A look like lacquered

thanks to new processing technologies

Edgebanding

Whether you want high-gloss uni edgeband, split lacquer design or 3D appearance, REHAU offers six different edgeband design lines for RAUVISIO brilliant that meet all expectations. There are a total of 39 edges perfectly suited to the coloured surfaces to choose from (also available in zero-joint quality).

Service

REHAU delivers the perfect package for the production of front panels from a single source: laminate, balancing sheet and the right edgeband.

Innovative storage solutions

CLIMBER BY LUDEWIG

The glass slat cabinet with comfort opening

CLIMBER by Ludwig brings the aesthetic world of glass into the kitchen. The electronically operated door captivates with its sophisticated real glass slats and is an elegant design solution for every kitchen.

The motorised, sensor-controlled opening mechanism makes for a much more comfortable operation. It is sufficient to lightly touch the sensor underneath the wall cabinet for the glass slats to smoothly slide up.

The slats are produced from ESG (tempered safety glass) due to which they can withstand everyday wear and tear. With their 13cm slat width, the slats in six different colour finishes create a harmonious two-dimensional front.

RAUVOLET VETRO LINE

Premium glass roller shutter system

WORLD'S FIRST 'PLUG AND PLAY' GLASS ROLLER SHUTTER SYSTEM

RAUVOLET Vetro Line offers a unique way of bringing together two previously incompatible solutions- the simple installation and convenient functional characteristics of tried and tested RAUVOLET cassette systems and the design feature of genuine glass. This ready-to-install cassette module just needs to be screwed into the cabinet.

Sizes available:

- 600 mm x 1,500 mm
- 900 mm x 1,500 mm

Colours available:

- Lacquered black
- Opti white
- Satinato frosted

Advantages:

- Space saving up to 30% compared to regular swing door - the roller shutter can be left open at any desired height for convenient 100% access.
- The excellent gliding properties offer smooth and quiet opening and closure of the cabinet. The roller shutter is designed to withstand heat, steam and water in the kitchen. While steam and water can cause regular swing doors to swell and eventually show cracks and bulges, RAUVOLET stays as new for years.

RAUVOLET METALLIC LINE FRAME 4

Delicate roller shutter system for stirring appearance

Purism is a popular design formula in the kitchen. The new delicate track system frame 4 now consistently gives this appearance to the tried and tested RAUVOLET Metallic-Line Tambour Door System.

With its 25 mm wide ribbed profiles in real aluminum or anodized stainless steel finish, the tried and tested RAUVOLET Metallic-Line Tambour Door System combines the functional properties of polymer tambour door system with the attractive appearance of high-quality real metal. The new elegant track system frame 4 now offers a matching design for the RAUVOLET Metallic-Line tambour doors. With a width of just 4mm, it frames the matt with an elegant metal finish, so that a plain surface becomes even more prominent as an element that enhances it visually. Frame 4 RAUVOLET Metallic-Line is supplied as a fully-fabricated vertical cassette system and therefore guarantees simple assembly.

Sizes available:

- 600 mm x 1,500 mm
- 900 mm x 1,500 mm

Colours available:

- Real aluminium finish (230 L)

Advantages:

- New, subtle design of the track system made from solid aluminium highlights the exclusive appearance of the RAUVOLET Metallic-Line effectively for the first time.
- Easy to install due to convenient cassette solution.
- Delicate track system and reduced accessories create a puristic design.
- Combination of exclusive aluminium or stainless steel surfaces with the convenient, functional properties of polymer tambour door systems.

RAUVOLET HORIZONTAL KIT

Space saver, the European style

RAUVOLET Wardrobe Kit represents an elegant & highly functional storage solution for residential applications & hotels. This system uses rigid and stable SE 16 profile designed especially for horizontal opening. Wardrobe Kit is available in two options of single and double door.

Size available - 1,950 mm (h) x 1,200 mm (w) x 600 mm (d)

Colour available - Silver (Single Door)

Type - SE 16 (Silver),

Material - PVC

RAUVOLET Office Kit represents highly functional storage solution for filling cabinets in office. This system uses rigid and stable SE 16 profile designed especially for horizontal opening.

Size available - 800 mm (h) X 1,000 mm (w) X 450 mm (d)

Colour available - Silver

Type - SE 16 (Silver)

Material - PVC

Advantages:

- Doesn't have a door that swings outwards (when opened), as a result, functional space of 30% is saved
- Full opening access with no passage obstruction
- Aesthetically appealing
- Easy to operate with minimum efforts
- Fully secure (with an optional lock)
- Fully safe as there are no sharp edges of opened swing doors
- Maintenance free
- No dust penetration when closed
- Smooth & quiet closure
- Designed to last for several years

AC TRAP DOOR

An innovative solution

Function:

To conceal the Fan Control Unit (FCU), which is a part of air conditioning system. The function of FCU is to blow cool air into the room and is hung to the roof.

Colour available:

- White

Size: As per the requirement

Advantages:

- Wood swelling due to water leakage reduces wood life. After a period of time, the swelled wood gives a shabby appearance, requires painting or replacement. RAUVOLET AC trap door is not affected by water, resulting in a longer product life
- While wooden door lacks aesthetics, RAUVOLET AC trap door promises superior looks
- During maintenance, when door is opened, it falls under gravity posing risk of hurting the maintenance person and damaging the wall surface. In the case of RAUVOLET AC trap door, the door slides easily and does not fall down

RAUKANTEX MAGIC 3D & II

The fascination of metal

RAUKANTEX Magic 3D

The transparent surfaces of RAUKANTEX Magic 3D create unique, three dimensional effects and make the decor appear even more distinctive. The new brushing structures used in RAUKANTEX Magic 3D is a special highlight which provides a noble look by means of colour shades like bronze, copper, gold, champagne, stainless steel or aluminium look.

Material	PMMA (Polymethyl methacrylate) with new decoration process
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23 mm x 2.00 mm

Advantages:

- Zero-hour adjustment time - no special adjustment required on machine parameters
- New perspectives in the creative edge design along with RAUVOLVET roller shutter
- Various combination of colours / décor and two different finishing on surface is possible

Size	23 mm x 2.00 mm
-------------	-----------------

RAUKANTEX Magic II

RAUKANTEX Magic II, simulates with its real metal foil a real aluminium or stainless steel edge. The edgeband has the characteristics of polymeric materials. As opposed to real metal edging, it offers advantages such as good radius properties and weight reduction. With RAUKANTEX Magic II and its great versatility, you can access an expressive treasure for a sophisticated interior design.

Material	PP (Polypropylene) with real aluminum or steel surface
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23 mm x 1.50 mm

Advantages:

- Combination of the design, metal foil with processing advantage of polymers
- Economical alternative for compact aluminum edge applications. Zero-hour adjustment time – no special adjustment required on machine parameters
- New perspectives in the creative edge design along with RAUVOLVET roller shutter
- Various combination of colours/décor & 2 different finishing on surface is possible

Size	23 mm x 1.50 mm

RAUKANTEX V-GROOVE

Glass and metal unite

A particular highlight within the RAUKANTEX visions range is the stepped edgeband with v groove. Whilst the upper section of the edgeband is available in typical glass colours, the lower section features aluminum or stainless steel. When combined with a surface of the same shade, this gives the appearance of a real glass top surface.

Material	PMMA (Poly Methylmetha Acrylate)
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23 mm x 1.30 mm

Availability of India Express Collection 1 week

RAUKANTEX SUPER HIGH GLOSS

The impressive gloss

Reflective, smooth surfaces are increasingly coming to the fore. In line with this trend, the **REHAU EXPRESS COLLECTION** includes attractive uni and decorative edgebands with the impressive super high gloss surface. This is perfectly matched to the high gloss surface of the boards and laminates.

With wide range of decorative designs in the dimension of 23mm x 1.30mm, the EXPRESS COLLECTION offers an attractive package.

Material	PVC & ABS
Lacquer type	Super High Gloss Lacquer
Size	23 mm x 1.30 mm

Availability of India Express Collection 1 week
Other sizes will be produced on request

Advantages:

- New super high gloss finish with gloss level of over 85 points with smooth and reflective surface.
- Designed to use in regular edge band machine without the need for special settings.
- Comes with protective film to prevent scratches during processing or transportation.

RETAIL COLLECTION

RAUCARP-C

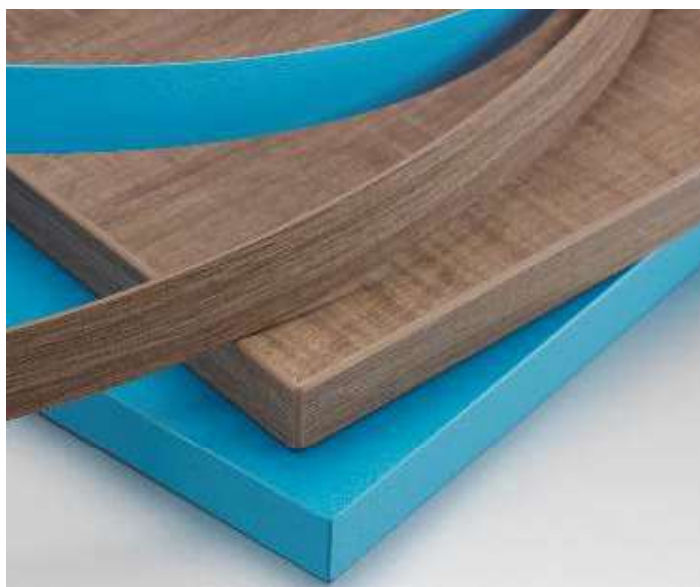

RAUCARP-C edgebands are a quality solution to protect your furniture from physical damages while enhancing its overall appearance. These edgebands are quite hyped-up across the carpenter's industry, and the best thing is that these can be applied manually on the edges of furniture. Moreover, these are highly economical and the best choice, when it comes to wooden binding and the replacement of melamine.

Material	PVC
Lacquer type	Matt
Size	22 X 0.4 mm
Roll Size	50 metre

RETAIL COLLECTION

50 metres

The advantages of the polymer material combined with the availability of exclusive shades make this 50 metre edgeband a sought after material for interiors. To cater to the needs of retail users, these edgebands are easily applied to the edges of furniture.

SELF ADHESIVE SCREW COVER CAPS

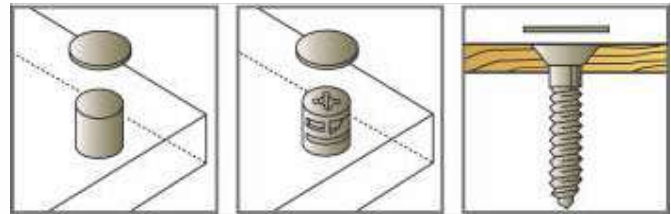

Innumerable possibilities of finishing

SELF ADHESIVE SCREW COVER CAPS OF PVC IT HAS NEVER BEEN SO EASY TO REACH PERFECTION

- Simple, practical and functional
- Solves finishing problems
- Easy application and low cost
- Using the same pattern of PVC edgeband provides the sophistication required by rigorous clients
- Available sizes: 12 mm and 18 mm in diameter
- Available in 18 colours

Example of applications:

APPLICATION

Surface to be applied: It must be free of dirt, dust, oil or any other substance that prevents full contact between the adhesive and the surface of application. We recommend a prior cleaning with a slightly damp cloth.

Removing the Cover Cap from the self-adhesive label: Only remove the Cover Cap from the self-adhesive label at the moment of applying it. Ensure that there is minimal contact between finger / glove and the adhesive.

Temperature: The ideal temperature for application is between 10°C and 50°C. This range is valid for self-adhesive material and the environment, and for the surface to which it will be applied.

Application of the Cover Cap: The Cover Cap needs to be pushed against the location where it is going to be applied. It is recommended to use a flannel or a plastic spatula with rounded corners. The result should be checked between 24 and 72 hours after application.

PVC-WRITING BOARD PROFILE

A new edge for writing board

REHAU writing board profile offers the user a product to suit every need. Smooth finish provides a neat border to the writing board. Available in various colors, REHAU high impact PVC writing board profile is the perfect edging solution in this segment.

RAUKANTEX TOOLS

For edgeband processing

NEW

RAUKANTEX TOOLS

Power package

KM08R Portable Edgebander + Box

KM08R Portable Edgebander is compact and lightweight machine suitable for factory or on site processing. This unit can be used in various format such as hand held edgebander, converting to table edgebander by mounting it to a working table or as simple as using it right out of the box where a small platform is integrated for the processing of smaller panels.

It has a fixed feed speed of 4m/min for easy handling and is suitable for edgeband, 0.5mm to 3.0mm thick and 10mm to 40mm width.

FR 256 R Power Edgeband Router

FR 256 R Power Edgeband Router trim edge band effortlessly with its powerful motor (750 W) and electronic speed adjustment. The electronic control maintains a constant speed, irrespective of the working load. Dust collector connection has three bases (hole 0 20, 26 and 30 mm) for being used with bits of different diameters. Standard units are equipped with a carbide bit r=3 mm, bearing with optional bits, available for several different radius.

Easy trimming of either straight or shaped work pieces

Easy preparation for corner trimming

Precise guide for corner trimming

Vacuum connection equipped

Round head (V3) included with the set

RAUKANTEX TOOLS

Polishing the radius and removing residue materials

RAUCORD WEAVING MATERIAL

The new generation weaving material

RAUCORD

Designed for the premium you

If you're one of those who love the luxurious appeal of wicker furniture but dread its upkeep, here's RAUCORD to your rescue. RAUCORD is a collection of high quality premium synthetic weaving material. With its superior characteristics and cutting-edge technology, RAUCORD offers you this relaxed and carefree experience both indoors and out.

HAVE FUN IN THE SUN

With its state-of-the-art UV stabilisation technology, RAUCORD weaving material is fade resistant, and will retain its quality even through the harshest attacks of summers. Test proven for 3,500 hours.

**100%
UV Protection**

PUTTING UP A TOUGH FRONT

RAUCORD ensures that the aesthetic appeal of your furniture remains intact with the dramatic overtures of the seasons. Extreme temperature matter little to the weatherproof and temperature resistant RAUCORD as it withstands -70 to 70°C.

**Outdoor
Resilience**

NO MESSY AFFAIRS

No more worries about leaving marks with spillages of coffee. RAUCORD is stain resistant and colourfast, safe from odours and mould. A few swipes with a damp cloth, and your furniture is good as new.

**Wipe-clean
Surface**

STAY IN SHAPE

RAUCORD does not crack, break or sag under heavy usage and heavy bottoms. Durability and resilience is achieved without compromising on shape and form, making RAUCORD the preferred choice.

**Strong and
Durable**

LIVING A GREEN LIFESTYLE

Furniture weaved by RAUCORD is recycled residue-free without posing any harmful effects to the environment. RAUCORD is non-toxic and meets international environmental protection standards (ISO 14001).

**Environment
Friendly**

SHOWING YOUR TRUE COLOURS

Over-exposure to the sun and abrasion can cause discolouration. Your RAUCORD furniture is safe from fading and scratches as it is coloured through, not surface printed. No additional treatment is required.

**Long-lasting
Colours**
